

Thermal Box Liners

Environmentally smart, foam-free, thermal packaging products manufactured to minimize environmental impact.

Time Tested Sustainable Products

As one of the first to introduce eco-conscious packaging solutions, MP Global proudly offers our line of 100% certified curbside recyclable Thermal Box Liners. These products combine sustainable sourcing with time-tested construction to deliver unmatched insulating performance.

Our Thermal Box Packaging Features Include:

Made from 97% post-industrial and pre-consumed recycled cardboard cellulose fibers, making the products cleaner

The **entire package** can be put into the recycle bin making it very easy to dispose of like ordinary curbside recyclables

Tested and certified repulpable and curbside recyclable based on OCC-E standards through WMU Pilot Plants Program

Uses a select blend of recycled DLK fibers that are also absorbent for the containment of spills

MP Global upcycles all left over materials from our manufacturing process in subsequent manufacturing, minimizing waste

MP Global uses more than 2 million pounds of recycled fiber each month in the manufacturing of our products

Our patented curbside recyclable product not only offers a high level of insulating value but also a soft cushioning to help protect products. U.S. Pat. No. 10,583,977
